### Sub – Jasdeep Singh visa application

Dear Mam,

I am writing this letter in support of the visa application of **Jasdeep Singh**. I am the Director of Fabril Solutions ltd at 3/1A Prangley Avenue, Auckland.

The below are the answers for the listed queries.

#### → What is your position of the applicant

Telecommunications Technician

#### → What are the applicant duties

As a telecommunication technician their main motto is to install the Fibre broad band connection at the customer premises and that will be in three phases.

- **Scope**
- **Build and**
- **Connect**

#### → Roles & Responsibilities:

- Installation of customer's equipment for wireless broad band and structured wiring.
- Plan, design, and troubleshoot local ICT products and wide area network infrastructure, including Wireless, Routers, and Landline telephones.
- Respond to inquire about the software and hardware problems & ensuring efficient use of applications and equipment
- Checking blueprints, diagram and specifications depending upon the job requirements
- Function diagnosis and reporting of faults utilising Radio test set equipment and diagnostic software as appropriate
- Testing, repairing & diagnosing faults
- Coordinate with service providers, analysing and troubleshooting NGA faults
- Monitor data network, perform troubleshoot on same, repair and replace Fibre, CAT5 and CAT6 cables.

- Connecting fibre at cabinet, fusion splicing at fibre access terminal (FAT), FTP & ONT.
- Generate daily, Weekly & monthly jobs & KPI's reporting
- Managing health & safety standards at all times, managing customer & work quality standards

➔ **Tell me about the recruitment process in terms of why the applicant was best fit for the role.**

Our complete recruitment process and trade me ad is attached herewith. However, Jasdeep was recruited from the ad I placed in Trade me. Upon receiving his CV from Trade me and assessment thereof, I immediately called him and asked him to come over for a personal round of interview. The key skills that I considered for the position were Jasdeep Sing's previous experience with Chorus Network, exposure to NZ work Culture, English language ability, personal presentation, and qualifications for the position. Also, he has done trainings which are necessary to work on chorus network and these courses are NZQA approved.

➔ **We are aware that there are many live applications supported by your company. Please explain and describe the need for so many positions in the same location?**

Since, we recently got the contract with UCG, that is on-going and the contract end date will be approximately for 4 years. We have a total of 17 vans operating currently which requires manpower. As I had mentioned above we got the contract with UCG recently & we are the subcontractors for Vision stream from the past two years and it's on going as well, we are offering three different locations for the technicians as we got branches at those locations, depending upon the work load the technician has to relocate that's the reason we are offering three different locations.

Also, as of now we are not hiring any more applicants may be in future for another 6 months if any vacancies at all.

Additionally, please find attached the company's flow chart which indicates the number of people required for this role with the contracts and number of vans in our hand.

Kind regards,

SID DOMA  
DIRECTOR
